

ProPress Stainless: Features & Benefits

Fast and Easy to Use

One squeeze of the trigger makes 1/2" to 4" connections in as little as five seconds – much faster than traditional methods of welding or threading pipe.

Safe

Now plumbers can focus more on installing fittings than worrying about burning down the building. With ProPress there are no flames, so no flame permits are required. With the Viega ProPress Stainless product no grinding is needed, also reducing fire hazard.

Clean

With copper, ProPress eliminates the need for any solder or flux to be used during installation. When it comes to stainless and marine products, Viega ProPress eliminates the need for welding rods, smoke or cutting oils – a welcome change.

Reliable

Viega press technology ensures a consistent, strong, reliable, water-tight/gas-tight seal with each connection. The patented Smart Connect feature identifies unpressed connections so they are not left behind. This winning combination creates a high-strength connection, guaranteed for many years. (Warranty varies by metal/usage.)

Minimizes System Downtime

ProPress allows you to join wet connections - making it the fastest solution for maintenance and emergency repair jobs.

Versatile

You can use ProPress virtually anywhere - in commercial, industrial and residential applications, for both new installations and renovation work. It also comes in sizes ranging from 1/2" up to 4" in all our metals.

Requires Less Equipment

With ProPress, there is no need to buy or carry expensive, cumbersome equipment such as tanks and hoses, and no need for supplies like thread cutters, solder and flux. Plus, one press tool can be used to make all your plumbing connections in copper, stainless and marine applications.

Produces Measurable Results

ProPress has rapidly become the preferred method for fast, clean and safe copper tubing joining, because connections install so quickly projects can be kept on or ahead of schedule. Viega brings more than 20 years of experience with press technology to a new stainless steel market this year.

Meets Codes & Standards

ProPress meets the most rigorous testing standards and codes in the U.S. and
